

I have been "addicted" to radio most of my life and have been grossly dissatisfied with the current state of commercial radio programming. Living in a rural area part of the time and urban area at other times, I find very few stations which offer needed information (traffic and weather) and pleasurable programming. I specifically need Atlanta traffic information in that I frequently commute to Atlanta from the Northeast Georgia Mountains. For enjoyment, I like to find stations that offer more than continuous playing of hip-hop, rock, acid rock, etc. XM Radio has offered many hours of pleasurable music.

Further, I would like to see PBR added to the XM Radio line up.

I really need XM Instant Traffic and Weather for the Atlanta area.
